**Bomb retrospective single Merck falsified research on vaccine for mumps and marketed vaccines fake does not work, say virologists in a document called the False Claims Act**

Wednesday, May 01, 2019 by: Mike Adams<sup>[2]</sup>

( Natural News<sup>[3]</sup> ) With the lying "central press" now dealing with 24/7 measles hysteria, you might be shocked to find out that the MMR vaccine does not work as it claims. Even Reuters now writes that 10% of those infected with measles had **previously been vaccinated against measles**.

Stunning recognition is found in an April 29<sup>[4]</sup> article in Reuters,<sup>[5]</sup> entitled "The US measles epidemic raises questions about immunity in adults." The article writes:

Up to 10% of the 695 confirmed cases of measles from the current outbreak occurred in people who received one or two doses of vaccine, according to the Center for Disease Control and Prevention (CDCP).

## **Merck FALSIFIED vaccine effectiveness reports and committed large-scale scientific fraud, virologists say**

If you wonder why so many people who have been vaccinated against measles, mumps and rubella are now infected with measles, you should remember that **Merck has falsified the MMR vaccine efficacy reports** by crossing human blood samples with antibodies from animals, according to two former Merck employees who say they have been ordered by the Merck management to deal with major scientific fraud.

Merck's two virologists, Stephen Krahling and Joan Wlochowski, completed a document called the False Claims Act in 2010, which specifically shows that the lie with the fraudulent vaccine is a rising risk that contributes to the outbreak of infectious diseases in future. That's exactly what we see today, of course, with the spread of measles all over America, even among those previously vaccinated against measles. (Because the vaccine does not work, have you caught it?)

Natural News first wrote in 2012<sup>[6]</sup>, and we have kept the original FCA document in the following link ensuring that it does not disappear from the internet:

[https://www.naturalnews.com/gallery/documents/Merck-False-Claims-Act.pdf<sup>\[7\]</sup>](https://www.naturalnews.com/gallery/documents/Merck-False-Claims-Act.pdf)

Read it too, and you will find the shocking truth about scientific fraud with vaccines that the central liar press does not dare to say.

Here's my original article in 2012:

### **Fraud of Merck's vaccines exposed by two virusologists from Merck virologists; the company has falsified the effectiveness of mumps vaccine for over ten years, say data from the trial**

According to two Merck scientists who completed a FCA form in 2010 - a complaint that has just been declassified - the Merck vaccine producer has knowingly falsified the results of tests for mumps vaccines, mixed blood samples with antibodies from animals, sold a vaccine that basically encourages the outbreak of mumps and measles and has scolded the governments and consumers who bought the vaccine thinking it was 95% effective."

See here the FCA document:

<https://www.naturalnews.com/gallery/documents/Merck-False-Claims-Act.pdf><sup>[8]</sup>

According to Stephen Krahling and Joan Wlochowski, both former virologists at Merck, Merck has engaged in the following behaviors:

- Merck knowingly falsified the results of the mumps vaccine test to make a "95%" efficiency.
- To do this, Merck **mixed blood tests with animal antibodies** to artificially inflate the appearance of immune system antibodies. As CourthouseNews.com writes:

Merck also added animal antibodies in blood samples to achieve more favorable results, although he knew that the human immune system would never produce such antibodies, and that the antibodies created a laboratory test scenario that would "not fit however, would not correlate with, or would not represent, real life in terms of neutralizing viruses in vaccinated people," according to the complaint. (<http://www.courthousenews.com/2012/06/27/478...><sup>[10]</sup>) :

- Merck then used the forged results to scold the US government "hundreds of millions of dollars for a vaccine"<sup>[11]</sup> that does not give adequate immunization."
- The fraudulent vaccine of Merck has practically contributed to the spread of mumps in America, causing more mumps infection in children. (waw, right? That's what NaturalNews has been writing for years ... Vaccines are basically made to perpetuate outbreaks because it's very profitable for repetitive business!)
- Merck<sup>[12]</sup> has used the false "95 percent efficiency" claim to **monopolize the vaccine market and remove potential competitors from the market**.
- Merck's vaccine fraud has been taking place since the late 1990s, virologists say.
- Merck's vaccine testing has never been done on viruses "real-world" mumps<sup>[13]</sup> (mumps in the real world) in the wild. Instead, test results were simply falsified to achieve the desired result.
- All the fraud took place "knowingly, with the authority and approval of Merck's top management."
- Merck researchers "personally witnessed inappropriate testing and falsification of Merck's data to artificially inflate findings on vaccine efficacy," according to court documents (see below).

### **The US government has decided to ignore the 2010 FCA document!**

În loc să ia măsuri în baza acestui document FCA, guvernul SUA pur și simplu l-a ignorat, preferînd să protejeze astfel monopolul de piață al lui Merck decât să servească justiția cum se cuvine. Asta demonstrează conspirația încă fraudă dintre guvernul SUA, reglementatorii FDA (administrația de alimente și medicamente) și industria vaccinurilor.

### **Chatom Primary Care dă în judecată compania Merck pentru monopolizarea Sherman Act, violarea de garanții și a legii protecției consumatorilor**

După desecretizarea acestui document FCA din 2010, Chatom Primary Care, cu sediul în Alabama, a mirodit ceva putred. Cu trei zile în urmă, Chatom a deschis un proces împotriva firmei Merck. Inregistrările procesului sunt disponibile aici:

[www.naturalnews.com/gallery/documents/Chatom...](https://www.naturalnews.com/gallery/documents/Chatom...)<sup>[14]</sup>

Ele acuză printre alte lucruri şocante:

[Merck s-a angajat în] ...o schemă întinsă pe zece ani pentru a falsifica și a prezenta eronat adevărată eficiență a propriului vaccin.

Merck a prezentat și continuă să prezinte pe etichete și oriunde că vaccinul anti oreion are o eficiență de 95% sau mai mare.

In realitate, Merck știe și a luat măsuri concrete pentru a ascunde —prin folosirea tehniciilor de testare inadecvate și falsificarea rezultatelor testelor — că vaccinul lor pentru oreion este, și a fost cel puțin din 1999, mult sub 95% eficiență.

Merck a creat o metodologie de testare care a evaluat propriul vaccin pe tulpini de virus oreion mult mai puțin virulente. După ce rezultatele au eşuat în a demonstra eficiența dorită de Merck, compania a abandonat metodologia și a ascuns rezultatele studiului.

...incorporat folosirea de anticorpi de la animale pentru a umfla artificial rezultatele...

...distrus dovezile falsificării datelor și apoi a mințit investigatorii de la FDA...

...amenințat un virolog de la divizia de vaccinuri a lui Merck cu închisoarea dacă raportează frauda la FDA...

...victimele supreme aici sunt milioanele de copii care sunt injectați în fiecare an cu un vaccin anti oreion<sup>[15]</sup> care nu le conferă un nivel adecvat de protecție. Și în timp ce asta-i o boală care ar fi trebuit, potrivit celor de la CDC, să fi fost eradicată la momentul actual, eșecul celor de la Merck a permis bolii să persiste, cu izbucniri semnificative de focare care continuă să apară.

Chatom Primary Care acuză de asemenea că fraudulosul vaccin de la Merck a contribuit la focarul de oreion din anul 2006 din Midwest, și la focarul generalizat din 2009. El spune că, "a rămas un risc semnificativ de revenire a epidemiei de oreion..."

### Această investigație este doar începutul

NaturalNews e doar la începutul investigației pe marginea știrilor incredibile despre Merck și industria vaccinurilor. Scormonim prin documentele din instanțe pentru a identifica informații adiționale ce ar putea fi relevante pentru acest caz, și ne propunem să vă aducem aceste informații în curând.

Ca idee, Merck neagă toate acuzațiile. E cineva surprins?
